

ERASMUS + PUCK 2017

CRITICAL THINKING

CRITICAL THINKING

- Ability to think clearly and rationally about what to do or what to believe.
- Enhances language and presentation skills
- Promotes creativity
- Is crucial for self-reflection
- Is the foundation of science and democracy

CRITICAL SKILLS

- Understand the logical connections between ideas
- Identify, construct and evaluate arguments
- Detect inconsistencies and common mistakes in reasoning
- Solve problem systematically, identify relevance and importance of ideas
- Reflect on the justification of one's own beliefs and values

GUIDE TO CRITICAL THINKING

1. Don't trust the first information - check it!

2. Use different sources to check the information

3. Be aware of the personal usage of words, for example amazing, unique, heartbreaking...-these are showing usage of personal opinion

~~Just because you are right,
does not mean, I am wrong.~~

But one of those people is wrong, someone painted a six or a nine, they need to back up and orient themselves, see if there are any other numbers to align with. Maybe there's a driveway or a building to face, or they can ask someone who actually knows.

People having an uniformed opinion about something they don't understand and proclaiming their opinion as being equally valid as facts is what is ruining the world. No one wants to do any research, they just want to be right.
